TECHNICAL ADVISORY COMMITTEE

The first step in preparing the Metropolis Plan was to convene a Technical Advisory Committee (TAC) to assure that the plan was based on the best professional, analytical and planning practices. Over two years the members of the TAC gave their time and energy to advise Chicago Metropolis 2020 on critical matters such as data resources, forecast and modeling methodology and alternative scenario construction. We thank the TAC for listening to numerous presentations, questioning assumptions, and making recommendations that improved the plan immeasurably.

The TAC was successful in part because of the commitment of the Chair, Frank So, former Executive Director of the American Planning Association. Frank's extensive planning experience, insights, and humor kept the Technical Advisory Committee on task and provided staff with excellent feedback throughout the process. In addition to serving as chair of the Technical Advisory Committee, he also served as Senior Advisor to Chicago Metropolis 2020, and editor at large of the Metropolis Plan: Technical Report.

INFORMATION AND DATA RESOURCES

The Metropolis Plan would not exist without the rich data resources that were used in the models and scenarios. Many organizations contributed up to date data on the region. We would especially like to recognize the contributions of the Northeastern Illinois Planning Commission (NIPC) and the Chicago Area Transportation Study (CATS). The Common Ground process initiated by NIPC has encouraged widespread regional discussion of critical issues. Both NIPC and CATS staff served the Metropolis Plan in a variety of capacities contributing their time, resources and data. Other data contributors include:

Center for Neighborhood Technology

Chicago Area Transportation Study

Chicago Region Biodiversity Council

Chicago Wilderness
